

**AVIAN SUN**

ITEM# AS-C5

**5.0**  
**UVA & UVB COMPACT**  
**FLUORESCENT LAMP**

## INSTRUCTIONS

Congratulations on your purchase of **Zoo Med's AvianSun 5.0 UVB Compact Fluorescent Lamp**; your birds will thank you! The following instructions will assist you in setting up your new lamp.

### LAMP FIXTURE:

This bulb is designed for use with **Zoo Med's AvianSun Deluxe Floor Lamp** fixture (Item AFL-10). See the following photo for an example of the correct setup.

### NOTE ON LAMP BURN IN:

Compact fluorescent lamps have a "burn in" period when the light and UVB output is at its greatest. For your new **AvianSun 5.0 Compact Fluorescent Lamp**, this period lasts about two weeks when the lamp is used to provide a normal photoperiod or day/night cycle at 10 to 12 hours per day (150 hours of use). Refer to the following chart for **recommended distances** during and after the burn in period. **Zoo Med's AvianSun Deluxe Floor Lamp** is fully adjustable enabling you to easily adjust the distance of the lamp to your bird's cage or perch.

### APPLICATION CHART:

	DURING/ AFTER BURN-IN	RECOMMENDED OPERATING DISTANCE*
Zoo Med's AvianSun Deluxe Floor Lamp	During burn-in	18-20" (46-51cm)
	After burn-in	12-14" (30-36cm)

### \*NOTES ON OPERATING RANGE:

\*The Recommended Distance refers to the distance from the lamp to your bird's perch. The lamp should be placed directly overhead of your bird. **DO NOT** place the lamp on the side of the cage causing your bird to stare into the lamp. **WARNING: DO NOT** place the lamp closer to your bird than the recommended distances listed above as eye damage may occur.

### WHEN TO REPLACE YOUR LAMP:

Your lamp will provide beneficial UVA and UVB for a period of 12 months. After 12 months, the lamp should be replaced with a new **AvianSun 5.0 UVB Compact Fluorescent Lamp**. Before you turn your lamp on for the first time, date the base of the lamp to remind yourself when to replace it.
