

# NATURALISTIC TERRARIUM REPTI LOCK

FIGURE 1

FIGURE 2

FIGURE 3

- 1. Set combination to 0-0-0:** Turn each dial (C) so that the combination reads 0-0-0 along the centerline beneath the arrow (B) as shown in **figure 1**. Pull up on the shank (A) to unlock.
- 2. Set new combination:** Rotate the shank 180 degrees and push down as shown in **figure 2**. The dials can now be turned to reset the three digit combination. Record the new combination in a secure place, or choose a combination that will be easy to remember.
- 3. Lock is ready for use:** After setting the new combination, pull up on the shank and rotate 180 degrees to the original position as shown in **figure 3**. Push down on the shank and then turn the dials to a random combination. The lock is now “locked” and ready for normal use.
