

REPTISUN® **UVB/LED**

ITEM# FS-LUV

INSTRUCTIONS

Congratulations on your purchase of **Zoo Med's ReptiSun® UVB LED Lamp**; your reptiles will thank you! The following instructions will assist you in determining the correct set-up for your application.

COMPATIBLE LAMP FIXTURES:

Follow the instructions below to determine the correct setup for your application.

- **Zoo Med's Naturalistic Terrarium Hoods:** For the lamp to be positioned horizontally over the terrarium. Designed to be placed on top of or above the screen cover.

12" Naturalistic Terrarium Hood
ITEM LF-50

18" Naturalistic Terrarium Hood
ITEM LF-55

NOTES ON SCREEN COVERS:

Screen covers on terrariums significantly reduce the amount of UVB that reaches your reptile's basking site. As the screen mesh gets finer, more UVB is blocked or filtered. Some reptile habitats may not include a screen cover (e.g., aquatic turtle tanks and tortoise habitats). **CAUTION:** Be sure that the lamp fixture is securely suspended above the enclosure in a manner that will prevent the lamp and fixture from falling into the enclosure.

APPLICATION CHART:

LAMP ARRANGEMENT / TERRARIUM SETUP

WITH SCREEN COVER		WITHOUT SCREEN COVER	
DO NOT USE:	1-7"	DO NOT USE:	1-8"
Ferguson Zone 4:	8-13"	Ferguson Zone 4:	9-15"
Ferguson Zone 3:	14-21"	Ferguson Zone 3:	16-24"
Ferguson Zone 2:	22-26"	Ferguson Zone 2:	25-31"
Ferguson Zone 1:	27-36"	Ferguson Zone 1:	32-40"

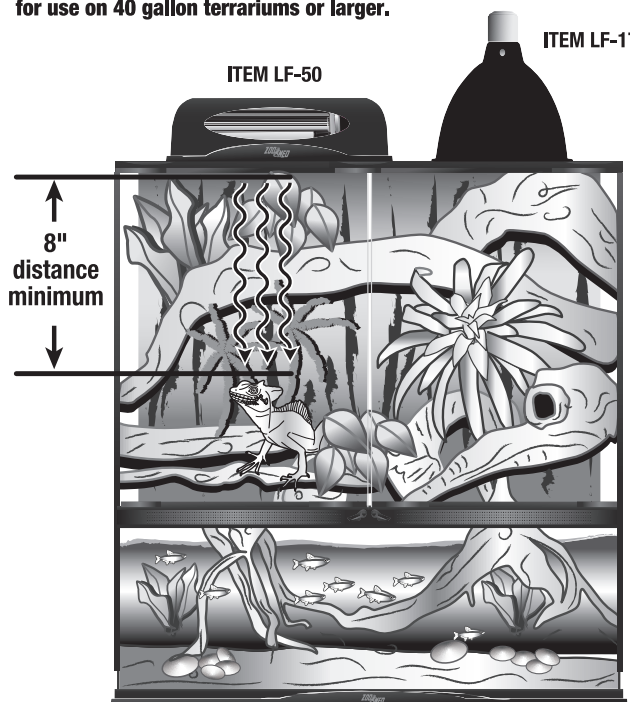

CAUTION:

The **ReptiSun® UVB LED Lamp** emits UV radiation and must be used in accordance with these instructions. Just as you would not stare into the sun, **DO NOT** stare into this lamp! This lamp must be placed directly above your reptile habitat and not to the side (so that your pet is not forced to stare into the lamp). Failure to use this lamp according to these instructions may result in injury. This lamp is intended for indoor use only.

*NOTES ON OPERATING DISTANCE:

The operating range is the distance from the lamp to the reptile's basking site. For your reptiles to benefit from the UVB, you must also provide the appropriate temperature for your species. Consult a care guide to learn more about the needs of your pet.

This lamp must be used at a minimum of 8" distance, recommended for use on 40 gallon terrariums or larger.

WHEN TO REPLACE YOUR LAMP:

Zoo Med Laboratories, Inc. (Zoo Med) warrants each **ReptiSun® UVB LED** to be free of defects in material and workmanship under normal use and service for 12 calendar months. The obligation under this warranty is limited to the repair or replacement, at Zoo Med's discretion, of the product or any part thereof, when the product is returned to Zoo Med, freight prepaid. No claim shall be allowed under this warranty if, in the opinion of Zoo Med, the **ReptiSun® UVB LED** has been subject to accident or improper usage, including but not limited to: water damage, improper storage, accidental dropping, etc. This warranty is in lieu of all other warranties and representations express or implied. Please include your receipt, full name, address, phone number, and email address along with a note explaining failure when sending any product back to Zoo Med.

DIGITAL UVI METERS:

If you are interested in measuring the UV Index that your lamp is producing, you may want to purchase Zoo Med's Digital UV Index Radiometer (Item# ST-7). This meter is available in the "store" section at www.zoomed.com, or by special order through your reptile product retailer.

*Please email or call us with any questions you may have.
